

PSYCHOLOGY 621/694A
 CLINICAL ASSESSMENT
 Fall, 2019
 Mondays, 3:00 P.M. – 6:00 P.M.
 (AND SOMETIMES WEDNESDAY 4:00-6:45 P.M.)
 ROOM 321 PSYCHOLOGY

Instructor: John J.B. Allen, Ph.D.
 Room 440 Psychology
 621-4992
 John.JB.Allen@Arizona.edu
 Office Hours: Most Thursdays 4:00 P.M. – 5:00 P.M. (OR BY APPT.)

Overview

The objective of this course is to provide students with a fundamental background in assessment and measurement, and to prepare students to function in clinical assessment settings. This didactic portion of the course (621) will cover those topics that will give students sufficient background, knowledge, and skills to function as an apprentice in an applied setting, to use assessment instruments in research settings, and to construct and evaluate assessment instruments and their application. To that end, this portion of the course will cover the following:

- Diagnosis and differential diagnosis using the DSM-5;
- Psychometric issues associated with inferring a diagnosis from interview, laboratory, or test data;
- Cultural and individual differences in psychological assessment and diagnosis;
- Structured diagnostic interviewing, unstructured clinical interviewing, assessment of suicide risk and mental status;
- Psychometric principles in assessment, test construction, test theory;
- The measurement of intelligence.

For Clinical Psychology Graduate students, the background, administration, and interpretation of specific assessment instruments will be covered in the practicum portion of the course (694a). This course will meet separately on seven occasions during the semester, most of them Wednesday afternoons.

Useful Information

A tentative schedule of topics and readings appears at the end of the syllabus. We will use two books, both of which I recommend purchasing online. The remaining readings will be available as pdf files, available at the class website: http://jallen.faculty.arizona.edu/psyc621_clinical_assessment .

American Psychiatric Association (2013). *Diagnostic and statistical manual of mental disorders: Fifth Edition (DSM-5)*. Washington, D.C.: Author.

Kaplan, R.M., & Saccuzzo, D.P. (2008). *Psychological testing: Principles, applications, and issues, (7th Edition)*. Belmont, CA: Thompson Wadsworth.

Whereas some of the course periods will be predominated by lecture, my pedagogical stance is that learning is enhanced in a participative environment. To that end, each of the students in the class will take responsibility for presenting a synopsis of and leading the discussion concerning selected readings (indicated in the reading list by a bulleted arrow ➤) at various points throughout the semester.

Requirements

Your grade (621) will be determined by a combination of:

- Performance on two exams to cover lecture, discussion, and readings (70%, with 47% from Exam 1 and 23% from Exam 2).
- Performance on a Test Construction, Item Analysis, Reliability, and Validity Exercise (20%).
- Presentation of readings when asked (10%; if you are prepared when asked, you will get the 10%; if you are not prepared, you can lose up to 5% of the total points on each occasion this would happen.)

Your grade for 694a will be determined (pass/fail) by whether or not you complete the required assessments and interviews (see separate syllabus). You will also receive a letter providing a written synopsis of your performance in the practicum.

University Policies and Other Information

Students with Special Needs

If you anticipate barriers related to the format or requirements of this course, please meet with me so that we can discuss ways to ensure your full participation in the course. If you determine that disability-related accommodations are necessary, please register with Disability Resources (621-3268; drc.arizona.edu) and notify me of your eligibility for reasonable accommodations. We can then plan how best to coordinate your accommodations.

Academic Integrity

Students are expected to adhere to the UA Code of Academic Integrity as described in the UA the Academic Integrity

policy: <https://deanofstudents.arizona.edu/policies-and-codes/code-academic-integrity> . Cheating or plagiarism on the exam or the paper will result in a failing grade for the course, a notice will be sent to the Dean's office, and expulsion from the University of Arizona can result. Plagiarism is defined as any case where one person tries to take credit for the ideas or work of another, including fellow students, or published authors (please see: <http://www.library.arizona.edu/help/tutorials/plagiarism>).

Other University Classroom Policies that Apply to this Class

Please familiarize yourself with these additional University Policies:

- Non-Discrimination and Anti-Harassment Policy. The University of Arizona is committed to creating and maintaining an environment free of discrimination: <http://policy.arizona.edu/human-resources/nondiscrimination-and-anti-harassment-policy>
- Threatening Behavior by Students. The University seeks to promote a safe environment where students and employees may participate in the educational process without compromising their health, safety, or welfare: <http://policy.arizona.edu/education-and-student-affairs/threatening-behavior-students>

Classroom Behavior Policy and the Use of Electronic Gizmos Specifically

It is my intent, and I ask you to join me, in creating a positive learning environment that is free from distractions. Computers or tablets may be used for note-taking and downloading lecture notes. As such they can be useful, but alas, they can also be a potent distraction. Please do not use them for other purposes (e.g. social media, e-chatting/texting, shopping, catching up on email, organizing a flash mob, plotting mass insurrection) or you will be asked to leave the classroom. Please turn your phones to silent mode and do not use them during class or you will be asked to leave the classroom.

Changes in Course Content, Schedule, Requirements

The information contained in this syllabus, other than the grade and absence policies, may be subject to change with reasonable advance notice, as deemed appropriate by the instructor.

Approximate Schedule of Topics and Readings

Please note that unless otherwise indicated, classes meet Monday 3-6 pm in room 321 Psychology.
Wednesday classes meet 4-6:45 pm in room 321 Psychology.

Class Date	Topics	Readings
26 August	Introductory Esoterica	
28 August Wednesday	DSM-5: Use of the Manual Schizophrenia and Psychotic Disorders Depressive disorders Bipolar and Related Disorders Phenomenology of Psychosis	American Psychiatric Association (2013). <i>Diagnostic and statistical manual of mental disorders: Fifth edition</i> . Washington, D.C.: Author. (DSM-5), pp. 19-24, 87-122, 155-188, 123-154. Kaplan, B. (1964). <i>The Inner World of Mental Illness</i> (pp.89-115). New York: Harper & Row.
2 September	Labor Day Holiday!	
9 September	DSM-5: Anxiety Disorders, Obsessive-Compulsive and Related Disorders Trauma- and Stressor-Related Disorders Stigmata and Labeling Proliferation of Disorders and the DSM-5	DSM-5, pp. 189-234, 235-264, 265-290. ➤ Rosenhan, D.L. (1973). On being sane in insane places. <i>Science</i> , 179, 250-258. Regier, D.A., Narrow, W.E., Kuhl, E.A., & Kupfer, D.J. (2009). The conceptual development of DSM-V. <i>American Journal of Psychiatry</i> , 166, 645-650. Frances, A. (2009). Whither DSM-V? <i>The British Journal of Psychiatry</i> , 195, 391-392. ➤ Widiger, T.A., & Crego, C. (2015). Process and Content of DSM-5. <i>Psychopathology Review</i> , 2, 162-176.
16 September	DSM-5: Dissociative Disorders, Somatic Symptom and Related Disorders Disruptive, Impulse-Control, and Conduct Disorders Substance-Related and Addictive Disorders Reliability of DSM-5 Prevalence of Disorders RDoC as an alternative to DSM	DSM-5, pp. 291-308, 309-328, 461-480, 481-590 (skimming specific substances). ➤ Freedman, R., Lewis, D.A., Michels, R., et al. Other rather useful information in the form of unsolicited advice for first-year students, in no particular order of importance, to be discussed after we discuss the syllabus:

- ✓ Useful Reference Materials to Obtain for Clinical Assessment
 - ✓ Medical Dictionary (pocket version or download an Android or iPhone app)
 - ✓ UpToDate Access free: ahsl.arizona.edu/uptodate
 - ✓ MMPI-2 interpretation book (e.g., *Interpreting the MMPI-2-RF*, Ben-Porath)
 - ✓ WAIS-IV interpretation book (e.g., *Essentials of WAIS-IV Assessments*; e.g., Lichtenberger & Kaufman)
- ✓ Join Professional Societies while a student (APA, APS, [SSCP](http://www.sscp.org), Discipline Specific Organizations) and Attend Professional Meetings
- ✓ Use a reference manager (e.g., Endnote or Mendeley or similar)
- ✓ Start documenting clinical hours now, rather than waiting until right before the application deadline in your fourth year, when you'd have to reconstruct your first year by going back to reports (if you have them) or to loose scraps of paper with scribbles and circles and arrows and a paragraph on the back of each one explaining what each one was. Visit the APPIC website to see what is required, or use TimeToTrack tool to track your hours: <https://time2track.com>. Note that APPIC stresses integrative reports, which you will begin to write late this semester.
- ✓ Great resources for clinical graduate students: <https://www.acadpsychclinicalscience.org/for-students.html>
- ✓ Be sure to have (or develop) a hobby!
