Instructor: John J.B. Allen, Ph.D.  
Room 440 Psychology  
621-4992  
John.JB.Allen@Arizona.edu  
Office Hours: Most Thursdays 4:30 P.M. – 5:30 P.M.  
MOSTLY IN PERSON, BUT ALWAYS WITH A ZOOM OPTION: https://arizona.zoom.us/j/83328055779

Course Objectives and Learning Outcomes
The objective of this course is to provide students with a fundamental background in assessment and measurement, and to prepare students to function in clinical assessment settings. This didactic portion of the course (621) will cover those topics that will give students sufficient background, knowledge, and skills to function as an apprentice in an applied setting, to use assessment instruments in research settings, and to construct and evaluate assessment instruments and their application. Specifically, upon completion of the course, students should be able to:

➢ Make well-informed diagnoses and differential diagnoses using the DSM-5-TR;  
➢ Understand the psychometric issues associated with inferring a diagnosis from interview, laboratory, or test data, including positive predictive value, negative predictive value, sensitivity, and specificity;  
➢ Understand and be sensitive to cultural and many other individual differences in psychological assessment and diagnosis;  
➢ Gain experience with structured diagnostic interviewing, unstructured clinical interviewing, assessment of suicide risk and mental status;  
➢ Understand and apply psychometric principles in assessment, test construction, and test theory, in order to evaluate the reliability and validity of assessment instruments;  
➢ Understand key concepts and controversies in the measurement of intelligence.

For Clinical Psychology Graduate students, the background, administration, and interpretation of specific assessment instruments will be covered in the practicum portion of the course (694a). This course will meet separately on seven occasions during the semester, most of them Wednesday afternoons.

Useful Information
A tentative schedule of topics and readings appears at the end of the syllabus. We will use two books, both of which I recommend purchasing online. The remaining readings will be available as pdf files, available at the class website: http://jallen.faculty.arizona.edu/psyc621_clinical_assessment.

I recommend purchasing the DSM, but it is also available online for free through the UA library. The Kaplan and Saccuzzo book can be rented from Amazon at a reasonable price, or you can also purchase a used copy from the 6th edition on up).

Whereas some of the course periods will be predominated by lecture, my pedagogical stance is that learning is enhanced in a participative environment. To that end, each of the students in the class will take responsibility for presenting a synopsis of and leading the discussion concerning selected readings (indicated in the reading list by a bulleted arrow ➢) at various points throughout the semester.
**Requirements**

Your grade (621) will be determined by a combination of:

- Performance on two exams to cover lecture, discussion, and readings (70%, with 47% from Exam 1 and 23% from Exam 2).
- Performance on a Test Construction, Item Analysis, Reliability, and Validity Exercise (20%).
- Presentation of readings when asked (10%: if you are prepared when asked, you will get the 10%; if you are not prepared, you can lose up to 5% of the total points on each occasion this would happen.)

Your grade for 694a will be determined (pass/fail) by whether or not you complete the required assessments and interviews (see separate syllabus). You will also receive a letter providing a written synopsis of your performance in the practicum.

**University Policies and Other Information**

**University of Arizona Land Acknowledgement**

The University of Arizona resides on ancestral lands of the Tohono O’odham and Pascua Yaqui nations, where many today continuously reside in their ancestral land. I acknowledge the privilege it is to teach and learn in this region and I express my gratitude to these nations. For more information about native lands on which UA sits, see [https://nasa.arizona.edu](https://nasa.arizona.edu).

**Diversity and Inclusion**

Diversity unites and moves us forward. The diverse backgrounds, experiences and perspectives that each student brings to this class will be viewed as a resource, strength, and benefit. In this class, we have a unique and important opportunity to learn from the information and ideas shared by each other, and we also a responsibility to do so with sensitivity and respect. Ideally, science would be objective. However, as you will learn, much of science is subjective and is historically built on a small subset of privileged voices. It is important to make note of this and to think about how significant research findings may be biased by their nature of being carried out on a typically small, non-representative sample of participants.

I would like to create a learning environment for my students that honors diverse identities (including race, ethnicity, gender, age, class, sexuality, nationality, religion, ability, etc.) and supports a diversity of experiences, thoughts, and perspectives. To learn more about the UA’s commitment to diversity and inclusion, please visit [https://diversity.arizona.edu](https://diversity.arizona.edu).

**Preferred Name and Gender Pronouns**

This course affirms people of all gender expressions and gender identities. If you would prefer that a different name from your legal one or the one that appears on the class roster be used, the university has established guidelines that allow students and employees to indicate their chosen or preferred first names. Please see the following link for more information: [http://lgbtq.arizona.edu/use-chosen-or-preferred-names](http://lgbtq.arizona.edu/use-chosen-or-preferred-names). I want to be sure that I refer to you in your preferred way. If you prefer a name other than the one on the class roster, please let me know. I will try our best to remember your preferred names and pronouns, but please also feel free to give me a reminder. Also, students are able to update and edit their pronouns in UAccess. To change your listed pronoun on UAccess, navigate to the Student Self Service page, go to the personal information section, and click on “Names.”

**Students with Special Needs**

If you anticipate barriers related to the format or requirements of this course, please meet with me so that we can discuss ways to ensure your full participation in the course. If you determine that disability-related accommodations are necessary, please register with Disability Resources (621-3268; drc.arizona.edu) and notify me of your eligibility for reasonable accommodations. We can then plan how best to coordinate your accommodations.

**Academic Integrity**

Students are expected to adhere to the UA Code of Academic Integrity as described in the UA the Academic Integrity policy: [https://deanofstudents.arizona.edu/policies-and-codes/code-academic-integrity](https://deanofstudents.arizona.edu/policies-and-codes/code-academic-integrity). Cheating or plagiarism on the exam or the paper will result in a failing grade for the course, a notice will be sent to the Dean’s office, and expulsion from the University of Arizona can result. Plagiarism is defined as any case where one person tries to take credit for the ideas or work of another, including fellow students, or published authors.
Other University Classroom Policies that Apply to this Class
Please familiarize yourself with these additional University Policies:

- Non-Discrimination and Anti-Harassment Policy. The University of Arizona is committed to creating and maintaining an environment free of discrimination: http://policy.arizona.edu/human-resources/nondiscrimination-and-anti-harassment-policy

- Threatening Behavior by Students. The University seeks to promote a safe environment where students and employees may participate in the educational process without compromising their health, safety, or welfare: http://policy.arizona.edu/education-and-student-affairs/threatening-behavior-students

Classroom Behavior Policy and the Use of Electronic Gizmos Specifically
It is my intent, and I ask you to join me, in creating a positive learning environment that is free from distractions. Computers or tablets may be used for note-taking and downloading lecture notes. As such they can be useful, but alas, they can also be a potent distraction. Please do not use them for other purposes (e.g. social media, e-chatting/texting, shopping, catching up on email, organizing a flash mob, plotting mass insurrection) or you will be asked to leave the classroom. Please turn your phones to silent mode and do not use them during class or you will be asked to leave the classroom.

COVID-19-related information
The COVID-19 pandemic is now into the third year, and remains a concern. Please see the University of Arizona COVID-19 Response Page (covid19.arizona.edu) for the latest information. Please also consider the following University guidelines:

- If you feel sick, or may have been in contact with someone who is infectious, stay home. Except for seeking medical care, avoid contact with others and do not travel.
- Notify your instructor(s) if you will be missing a course meeting or an assignment deadline.
- Non-attendance for any reason does not guarantee an automatic extension of due date or rescheduling of examinations/assessments. Please communicate and coordinate any request directly with your instructor.
- If you must miss the equivalent of more than one week of class, you should contact the Dean of Students Office DOS-deanofstudents@email.arizona.edu to share documentation about the challenges you are facing.
- Voluntary, free, and convenient COVID-19 testing is available for students on Main Campus.
- If you test positive for COVID-19, the CDC and UA recommend a five-day quarantine period for those who are fully vaccinated, and ten days for those who are not.
- COVID-19 vaccine is available for all students at Campus Health.
- Visit the UArizona COVID-19 page for regular updates.

Changes in Course Content, Schedule, Requirements
The information contained in this syllabus, other than the grade and absence policies, may be subject to change with reasonable advance notice, as deemed appropriate by the instructor.

Other rather useful information in the form of unsolicited advice for first-year students, in no particular order of importance, to be discussed after we discuss the syllabus:

✓ Useful Reference Materials to Obtain for Clinical Assessment
  ✓ Medical Dictionary (download an Android or iPhone app: https://asoftclick.com/best-medical-dictionary-apps/)
  ✓ UpToDate Access free: ahsl.arizona.edu/uptodate

✓ Use a reference manager (e.g., Zotero, Endnote, or Mendeley or similar)

✓ Join Professional Societies while a student (APA, APS, SSCP, Discipline Specific Organizations) and Attend Professional Meetings

✓ Start documenting clinical hours now, rather than waiting until right before the application deadline in your fourth year, when you’d have to reconstruct your first year by going back to reports (if you have them) or to loose scraps of paper with scribbles and circles and arrows and a paragraph on the back of each one explaining what each one was. Visit the APPIC website to see what is required, or use TimeToTrack tool to track your hours: https://time2track.com. Note that APPIC stresses integrative reports, which you will begin to write late this semester.

✓ Great resources for clinical graduate students: https://www.acadpsychclinicalscience.org/for-students.html

✓ Be sure to have (or develop) a hobby!
